## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 2, 4, and 7-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Gonsalves et al (WO 02/073308).

Gonsalves discloses a high resolution polymeric resist comprising a monomer having in its side chain a structure meeting the limitations of the instant claims 1 and 2 (see the POSS formula). The resist comprises this monomer in an amount meeting the instant claim 4. The resist further comprises a surfactant and a solvent. The photoacid generators of the reference include sulfonium compounds disclosed by the instant specification, and are thus capable of generating acid by heat. Therefore, the instant claims 1, 2, 4, and 7-9 are anticipated by the reference.

### *Allowable Subject Matter*

3. Claims 3, 5, and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art of record fails to teach or suggest to one of ordinary skill in the art to prepare the material of the instant claim 1 wherein the material comprises a monomer meeting

the structural limitations of the instant claim 3, or wherein the composition comprises a crosslinking agent.

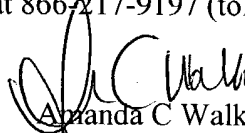

2. The following is a statement of reasons for the indication of allowable subject matter:

The instant claims 10-15 are indicated as containing allowable subject matter as the prior art of record fails to teach or suggest a two layer resist method including etching steps..
